MANAGEMENT'S DISCUSSION AND ANALYSIS

FOR THE YEAR ENDED MARCH 31, 2020

IM EXPLORATION INC.
MANAGEMENT'S DISCUSSION AND ANALYSIS
For the Year Ended March 31, 2020
Dated - July 28, 2020

Introduction

The following Management's Discussion and Analysis ("MD&A") of the financial condition and results of the operations of IM Exploration Inc. (the "Company" or "IM Exploration") constitutes management's review of the factors that affected the Company's financial and operating performance for the fiscal year ended March 31, 2020.

This MD&A has been prepared in compliance with the requirements of Form 51-102F1, in accordance with National Instrument 51-102 – Continuous Disclosure Obligations. This MD&A should be read in conjunction with the audited annual financial statements of the Company for the years ended March 31, 2020 and 2019, together with the notes thereto. Results are reported in Canadian dollars, unless otherwise noted. In the opinion of management, all adjustments (which consist only of normal recurring adjustments) considered necessary for a fair presentation have been included. The results for the fiscal year ended March 31, 2020 are not necessarily indicative of the results that may be expected for any future period. Information contained herein is presented as at July 28, 2020 unless otherwise indicated.

The financial statements and the financial data in this MD&A have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and interpretations issued by the International Financial Reporting Interpretations Committee ("IFRIC").

For the purposes of preparing this MD&A, management, in conjunction with the Board of Directors, considers the materiality of information. Information is considered material if: (i) such information results in, or would reasonably be expected to result in, a significant change in the market price or value of IM Exploration's common shares (the "Common Shares" or "common shares"); or (ii) there is a substantial likelihood that a reasonable investor would consider it important in making an investment decision; or (iii) it would significantly alter the total mix of information available to investors. Management, in conjunction with the Board of Directors, evaluates materiality with reference to all relevant circumstances, including potential market sensitivity.

Additional information relating to IM Exploration Inc. is available under the Company's SEDAR profile at www.sedar.com.

Caution Regarding Forward-Looking Statements

This MD&A contains certain forward-looking information as defined in applicable securities laws (collectively referred to herein as "forward-looking statements"). These statements relate to future events or the Company's future performance. All statements other than statements of historical fact are forward-looking statements. Often, but not always, forward-looking statements can be identified by the use of words such as "plans", "expects", "budgets", "scheduled", "estimates", "continues", "forecasts", "projects", "predicts", "intends", "anticipates" or "believes", or variations of, or the negatives of, such words and phrases, or state that certain actions, events or results "may", "could", "would", "should", "might" or "will" be taken, occur or be achieved. The forward-looking statements in this MD&A speak only as of the date of this MD&A or as of the date specified in such statement.

IM EXPLORATION INC.
MANAGEMENT'S DISCUSSION AND ANALYSIS
For the Year Ended March 31, 2020
Dated - July 28, 2020

Forward-looking statements	Assumptions	Risk factors
Statements regarding the sufficiency of the Company's working capital; the Company's business objectives and exploration program for fiscal 2021.	The Company has anticipated all material costs; the operating activities of the Company for the next 12 months, and the costs associated therewith, will be consistent with IM Exploration's current expectations; the Company will be successful in planning and executing its objectives, including its exploration program.	Unforeseen costs will arise; any particular operating costs increase or decrease from the date of the estimation; changes in economic and financial market conditions and metals prices; difficulties in completing objectives in a timely manner or at all; risks associated with mineral exploration.
The Company will be required to raise additional capital in order to meet its ongoing operating expenses and complete its planned exploration activities on its Mulloy Project (as defined herein).	The operating and exploration activities of the Company, and the costs associated therewith, will be consistent with the Company's current expectations; equity markets, exchange and interest rates and other applicable economic conditions are favourable to IM Exploration.	Volatility in equity markets; timing and availability of external financing on acceptable terms; increases in costs; environmental compliance and changes in environmental and other local legislation and regulation; interest rate and exchange rate fluctuations; changes in economic conditions.
Management's outlook regarding future trends and future uses of cash.	Financing will be available for IM Exploration's exploration and operating activities; the price of metals will be favourable.	Metal price volatility; volatility in equity markets; changes in economic conditions.

Inherent in forward-looking statements are risks, uncertainties and other factors beyond IM Exploration's ability to predict or control. Please also make reference to those risk factors referenced in the "Risks and Uncertainties" section below. Readers are cautioned that the above chart does not contain an exhaustive list of the factors or assumptions that may affect the forward-looking statements herein, and that the assumptions underlying such statements may prove to be incorrect.

Forward-looking statements in this MD&A involve known and unknown risks, uncertainties and other factors that may cause IM Exploration's actual results, performance or achievements to be materially different from any of its future results, performance or achievements expressed or implied by forward-looking statements. All forward-looking statements herein are qualified by this cautionary statement. Accordingly, readers should not place undue reliance on forward-looking statements. The Company undertakes no obligation to update publicly or otherwise revise any forward-looking statements whether as a result of new information or future events or otherwise, except as may be required by law. If the Company does update one or more forward-looking statements, no inference should be drawn that it will make additional updates with respect to those or other forward-looking statements, unless required by law.

IM EXPLORATION INC.
MANAGEMENT'S DISCUSSION AND ANALYSIS
For the Year Ended March 31, 2020
Dated - July 28, 2020

Description of Business

The Company was incorporated under the name "Prize Exploration Inc." pursuant to the Canada Business Corporations Act on April 19, 2017. The Company's registered office and head office is located at 181 Bay Street, Brookfield Place, Suite 4400, Toronto, Ontario, M5J 2T3. On February 14, 2019, the Company changed its name from Prize Exploration Inc. to IM Exploration Inc.

IM Exploration's principal business carried on and intended to be carried on is mineral exploration, focusing initially on the exploration and development of the Company's principal property, the Mulloy project located in Rowlandson Township, Porcupine Mining Division, District of Cochrane, Ontario (the "Mulloy Project").

From time to time the Company may also evaluate other mining projects and opportunities.

Overall Performance and Outlook

The Company has no revenues, so its ability to ensure continuing operations is dependent on it completing the acquisition of its mineral property interests, its ability to obtain necessary financing to complete exploration activities thereon, and ultimately, development of and future profitable production from its mineral property interests.

At March 31, 2020, the Company had working capital of \$207,788 (March 31, 2019 – \$111,495). The Company had cash and cash equivalents of \$249,368 (March 31, 2019 - \$192,859). Working capital and cash and cash equivalents increased during the year ended March 31, 2020 due to proceeds from the initial public offering, as described further below.

The Company believes that it has sufficient capital to meet its ongoing operating expenses, and to continue its Phase 1 program at the Mulloy Project. Management may increase or decrease budgeted expenditures depending on exploration results and the general economic environment. See "Financial Highlights - Liquidity and Capital Resources" below.

On May 29, 2019, the Company completed its IPO pursuant to which it has issued an aggregate of 3,000,000 common shares at a price of \$0.10 per common share to raise aggregate gross proceeds of \$300,000, all pursuant to a final prospectus dated March 29, 2019. In connection with the Offering, a cash commission of \$30,000, a corporate finance fee of \$12,500, legal and other fees of \$42,616 was paid and, 100,000 compensation warrants and 300,000 agent's warrants were issued, each such warrant entitling the holder to acquire one common share at an exercise price of \$0.10 for a period of 24 months from the date of closing of the Offering.

On May 29, 2019, the Company issued 300,000 common shares as part the option agreement for the Mulloy project situated in the Rowlandson Township, Porcupine Division in Ontario.

On May 29, 2019, the Company granted 725,000 stock options to directors, officers and consultant which are exercisable for a period of five years from the date of the grant at an exercise price of \$0.10 per common share. The options will vest as follows: 375,000 immediately, 150,000 on October 31, 2019 and 200,000 on the earlier of: (i) April 30, 2020; and (ii) the notice of a "triggering event" as defined in the Company's stock option plan.

On July 2, 2019, the Company granted an aggregate of 100,000 stock options to a consultant of the Company at an exercise price of \$0.10 each with a term of 5 years.

IM EXPLORATION INC.
MANAGEMENT'S DISCUSSION AND ANALYSIS
For the Year Ended March 31, 2020
Dated - July 28, 2020

On October 1, 2019, the Company granted an aggregate of 50,000 stock options to the new Chief Financial Officer and Corporate Secretary of the Company at an exercise price of \$0.09 each with a term of 5 years.

On March 11, 2020, the Company announced an intention to complete a private placement for gross proceeds of up to \$800,000. The Company subsequently determined not to proceed with the private placement, in June 2020.

The Company's primary business objective is to explore the Mulloy Project. In furtherance of this objective, the Company has an option to acquire a 90% undivided interest in and to the Mulloy Project by paying certain consideration and completing a feasibility study (see "Exploration and Projects" below).

For the Company to achieve this primary objective, its ancillary business objectives include: completion of an initial public offering of Common Shares (the "IPO" or the "Offering") (completed); and the completion of the Phase 1 recommended work program on the Mulloy Project at an estimated cost of approximately \$125,200, as described in the technical report dated effective March 15, 2019 in respect of the Mulloy Project (the "Technical Report") (in progress).

The Company completed permitting in September 2019 and has commenced Phase 1 of the recommended program, and will conduct further exploration (including Phase 2, if warranted) depending upon the results of such program. In addition, the Company may seek to acquire additional exploration stage properties should a property of interest become available to it.

Exploration and Projects

Mulloy Project

The principal asset of the Company consists of its option to acquire a 90% undivided interest in the Mulloy Project located near Cochrane, Ontario (the "Property").

Pursuant to an option agreement dated effective November 30, 2017 among IM Exploration (then called Prize Exploration Inc.) and three optionors of the Mulloy Project (the "Option Agreement"), for IM Exploration to exercise its option to acquire the 90% interest in the Mulloy Project it must fulfill the following requirements:

1. pay \$5,000 to each optionor within 10 calendar days of the execution of the Option Agreement for an aggregate payment to the optionors of \$15,000 (paid);
2. issue 100,000 Common Shares to each optionor upon completion of the IPO, for an aggregate issuance to the optionors of 300,000 Common Shares (issued); and
3. complete a feasibility study in respect of the Mulloy Project.

Should the Company exercise its option, then pursuant to the terms of the Option Agreement, the optionors will form a joint venture with IM Exploration in respect of the Mulloy Project and will retain a 2% net smelter royalty ("NSR") on the Mulloy Project. The Company will have the option, exercisable at any time, to reduce the NSR to 1% upon payment to the optionors in the aggregate amount of \$1,000,000.

During the fiscal year ended March 31, 2020, work at the Mulloy Project consisted of 10 kilometres of preliminary line-cutting, followed by 9 kilometres of geophysical surveying, both magnetic and electromagnetic (HLEM). Exploration efforts were concentrated around a prospective target at the western boundary of the Property.

Two conductors were identified from the November-to-December 2019 survey. The first conductor ("Conductor A") is coincident with a strong magnetic high and is interpreted to be associated with a potential iron formation. In the vicinity of the Property, iron formations can be associated with base metal and gold mineralization. The conductor extends roughly east-west across the entire survey area (500 metres) and remains open at both ends.

IM EXPLORATION INC.
MANAGEMENT'S DISCUSSION AND ANALYSIS
For the Year Ended March 31, 2020
Dated - July 28, 2020

The second conductor ("Conductor B") shows a slightly weaker response with no significant magnetic correlation. The lack of a magnetic response would suggest that Conductor B represents a graphite target. Conductor B runs parallel to Conductor A for approximately 200 metres and remains open to the west of the survey area.

Further exploratory sampling and drilling would be required before the Company can confirm these interpretations.

No additional work prior to August 13, 2020 is required to keep the Mulloy Project in good standing.

The Technical Report recommended a budget of approximately \$325,200 to carry out the proposed work programs at the Mulloy Project.

Plans for the Mulloy Project	Planned Expenditures (approx.)
Phase 1 – Vertical Drilling & Geophysical Survey Conduct a small geophysical grid survey. Drilling of two vertical holes to test the original graphite zone from historical drilling.	\$125,200
Subtotal	\$125,200
Phase 2 - Exploration Drilling Dependent on the success of Phase 1, a drilling campaign of approximately 900 metres across the Mulloy Project.	\$200,000
Subtotal	\$200,000
Total Phase 1 and 2	\$325,200

Qualified Person

Case Lewis, P.Geo. is the Company's designated Qualified Person within the meaning of National Instrument 43-101 *Standards of Disclosure for Mineral Projects* and has reviewed and approved the scientific and technical content reproduced in this MD&A.

Trends

The Company is a mineral exploration company, focused on the exploration of the Mulloy Project in Ontario, Canada, and the acquisitions of other mineral exploration properties, should such acquisitions be consistent with the objectives and acquisition criteria of the Company.

The Company's future performance and financial success is largely dependent upon the extent to which it can discover mineralization and the economic viability of developing its properties. The development of assets may take years to complete and the resulting income, if any, is difficult to determine with any certainty. The Company lacks mineral resources and mineral reserves and to date has not produced any revenues. The sales value of any minerals discovered by the Company is largely dependent upon factors beyond its control, such as the market value of the commodities produced.

Current global economic conditions and financial markets, although recently strong, remain fragile and susceptible to unexpected volatility, and are likely to be so for the foreseeable future. There are also significant uncertainties regarding the price of graphite and other minerals and the availability of equity financing for the purposes of mineral exploration and development. The Company's future performance is largely tied to the development of its current mineral property interest and the overall financial markets.

IM EXPLORATION INC.
MANAGEMENT'S DISCUSSION AND ANALYSIS
For the Year Ended March 31, 2020
Dated - July 28, 2020

Future volatility of financial markets as well as any instability of the global economy may result in the Company having difficulties raising equity financing for the purposes of mineral exploration and development, particularly without excessively diluting present shareholders of the Company. In this regard, the Company's strategy is to explore the Mulloy Project and seek out other prospective resource properties to acquire, while monitoring the global markets and seeking out financing, if and when available, upon terms acceptable to the Board of Directors. The Company believes this focused strategy will enable it to best manage its capital markets needs while maintaining momentum on key business initiatives.

Off-Balance-Sheet Arrangements

As of the date hereof, the Company does not have any off-balance-sheet arrangements.

Proposed Transactions

The Company is not currently contemplating any proposed asset or business acquisitions or dispositions.

Environmental Contingency

The Company's exploration activities are subject to various government laws and regulations relating to the protection of the environment, and all phases of the Company's operations are subject to environmental regulation in the Province of Ontario. These environmental regulations are continually changing and generally becoming more restrictive. The Company plans to maintain a policy of operating its business in compliance with all environmental regulations. The Company does not believe that it has any significant environmental obligations in the near future.

Selected Annual Financial Information

The following is selected financial data derived from the audited annual financial statements of the Company as at March 31, 2020, 2019 and 2018, and for the years then ended.

Selected Quarterly Financial Information

A summary of selected financial information of the Company for the most recent eight fiscal quarters are as follows:

Three Months Ended	Total Revenue \$	Loss (income)	
		Total \$	Per Share \$
31. March 2020	Nil	78,929	0.01
31. December 2019	Nil	21,673	0.00
30. September 2019	Nil	40,848	0.00
30. June 2019	Nil	16,893	0.00
31. March 2019	Nil	27,428	0.00
31. December 2018	Nil	52,012	0.01
30. September 2018	Nil	18,342	0.00
30. June 2018	Nil	18,913	0.00

- The net loss for the three months ended March 31, 2020, consisted primarily of: (i) professional fees of \$60,144; (ii) filing fees of \$5,864; and (iii) share-based payments of \$11,922.
- The net loss for the three months ended December 31, 2019, consisted primarily of: (i) professional fees of \$2,006; (ii) filing fees of \$3,528; and (iii) share-based payments of \$12,928.
- The net loss for the three months ended September 30, 2019, consisted primarily of: (i) professional fees of \$23,441; (ii) filing fees of \$9,795; and (iii) share-based payments of \$7,500. During this period the Company planned exploration activities.
- The net loss for the three months ended June 30, 2019, consisted primarily of: (i) professional fees credit of \$58,355; (ii) filing fees of \$16,246; (iii) share-based payments of \$31,652 and (iv) one-time bonus of \$23,000. During this period the Company completed its IPO.
- The net loss for the three months ended March 31, 2019, consisted primarily of: (i) professional fees of \$24,272; (ii) filing fees of \$4,800; and (iii) consulting fees of \$1,043.
- The net loss for the three months ended December 31, 2018, consisted primarily of: (i) professional fees of \$36,223; (ii) filing fees of \$3,675; (iii) consulting fees of \$8,850 and (iv) general and administrative expenditures of \$3,264.
- The net loss for the three months ended September 30, 2018, consisted primarily of: (i) professional fees of \$9,845; (ii) consulting fees of \$7,500; and (iii) general and administrative expenditures of \$997.
- The net loss for the three months ended June 30, 2018, consisted primarily of: (i) professional fees of \$8,498; (ii) consulting fees of \$10,000 and (iii) general and administrative expenditures of \$415.

IM EXPLORATION INC.
MANAGEMENT'S DISCUSSION AND ANALYSIS
For the Year Ended March 31, 2020
Dated - July 28, 2020

Discussion of Operations

Financial Performance

For the three months ended March 31, 2020, compared to the three months ended March 31, 2019.

IM Exploration's net loss totaled \$78,929 for the three months ended March 31, 2020, with basic and diluted loss per share of \$0.01. This compares with a net loss of \$27,428 for the three months ended March 31, 2019, with basic and diluted loss per share of \$0.00. The decrease in the net loss of \$51,501 was principally because:

- For the three months ended March 31, 2020, professional fees increased by \$35,872. The increase is primarily due to the expense of the legal fees for preparation of documents for the IPO that had been capitalized during the three months ended June 30, 2019.
- For the three months ended March 31, 2020, share-based payments were \$11,922 compared to \$nil for during the three months ended March 31, 2019.

For the fiscal year ended March 31, 2020, compared to the fiscal year ended March 31, 2019.

IM Exploration's net loss totaled \$158,343 for the fiscal year ended March 31, 2020, with basic and diluted loss per share of \$0.02. This compares with a net loss of \$116,695 for the fiscal year ended March 31, 2019, with basic and diluted loss per share of \$0.02. The increase in the net loss of \$41,648 was principally because:

- For the twelve months ended March 31, 2020, professional fees decreased by \$49,766. This decrease is primarily due to IPO-related legal fees, that were expensed during the twelve months ended March 31, 2019. During the year ended March 31, 2020, \$22,866 of these legal expenses were capitalized as part of IPO shares issuance cost.
- For the twelve months ended March 31, 2020, consulting fees deceased by \$26,673. The consulting fees paid during the twelve months ended March 31, 2019 related to the completion of the Technical Report as well as consulting contracts for providing strategic advisory services to the Company.

The decrease were offset by:

- For the twelve months ended March 31, 2020, share-based payments increased by \$64,002. The increase is due to 725,000 stock options issued; 100,000 stock options issued on July 2, 2019 and vesting thereof; and 50,000 stock options issued on October 1, 2019.
- For the twelve months ended March 31, 2020, filing fees increased by \$26,957. This increase is due to filing and listing fees paid related to the IPO and listing on the CSE.
- For the twelve months ended March 31, 2020, \$23,000 was expensed as a one-time bonus, including the following: As disclosed in the Company's prospectus dated March 29, 2019 the Company's CEO and Directors received bonuses upon completion of the IPO which bonuses were not paid until June 2020. The Company's CEO and Directors are not otherwise paid for their roles with the Company.

IM EXPLORATION INC.
MANAGEMENT'S DISCUSSION AND ANALYSIS
For the Year Ended March 31, 2020
Dated - July 28, 2020

Cash Flow

The Company had cash and cash equivalents of \$249,368 (March 31, 2019 - \$192,859). The increase in cash and cash equivalents during the twelve months ended March 31, 2020 was primarily due to cash received from the IPO, which was offset by the cash used in operating activities and exploration and evaluation expenditures.

Cash and cash equivalents used in operating activities was \$134,125 for the twelve months ended March 31, 2020. Operating activities were affected by non-cash adjustment of share-based payment of \$64,002 and the change in non-cash working capital balances because of a decrease in accounts payable and accrued liabilities of \$58,198 and an increase in amounts receivable and other assets of \$20,411; which was partially offset by decrease of \$38,825 in prepaid expenditure, for which cash was previously paid but the related expenses were only realized in the period.

Cash used for investing activities was \$24,250 for the twelve months ended March 31, 2020, because of exploration and evaluation expenditures at its Mulloy Project.

Cash provided by financing activities was \$214,884 for the twelve months ended March 31, 2020, primarily because of net proceeds of received from the issuance of Common Shares through the IPO. Share issuance costs include, among other things, IPO agent commissions, fees, and expenses; IM Exploration's IPO-related legal expenses; and various disbursements.

Liquidity and Capital Resources

The activities of the Company - principally the acquisition, exploration and development of mineral properties - are currently financed through the completion of equity offerings. There is no assurance that equity financing will be available to the Company in the amounts or at the times desired or on terms that are acceptable to the Company, if at all.

The Company has no operating revenues and therefore must utilize its funds obtained from equity financing and other financing transactions to maintain its capacity to meet ongoing exploration and operating activities. The cash resources of IM Exploration are held with major Canadian financial institutions.

The Company's uses of cash at present occur, and in the future are expected to occur, principally in two areas, namely, funding of its general and administrative expenditures and its exploration activities. Those exploration activities include Phase 1 of the exploration and evaluation of the Mulloy Project, as set out in the Technical Report. Under the Option Agreement, for the Company to acquire 90% of the legal and beneficial right, title and interest in and to the Mulloy Project, the Company has to complete a feasibility study. Such a study will involve exploration and data verification. Management may reassess its planned expenditures based on the degree of success of its exploration program, the Company's working capital resources, the scope of work required to advance the exploration of the Mulloy Project, and the overall condition of the financial markets.

The Company's working capital of \$207,788 at March 31, 2020, is not anticipated to be adequate to complete the Phase 1 and Phase 2 programs recommended by the Technical Report (see "Overall Performance and Outlook" and "Exploration and Projects" above). The Company will require additional equity financing in order to complete its planned objectives.

IM EXPLORATION INC.
MANAGEMENT'S DISCUSSION AND ANALYSIS
For the Year Ended March 31, 2020
Dated - July 28, 2020

Critical Accounting Policies and Estimates

The details of IM Exploration's accounting policies are presented in Note 3 of the audited financial statements ended March 31, 2020. These policies are considered by management to be essential to understanding the processes and reasoning that go into the preparation of the Company's financial statements and the uncertainties that could have a bearing on its financial results.

Accounting Standards Issued But Not Yet Effective

Several new accounting standards, amendments to standards, and interpretations are issued but not yet effective up to the date of issuance of the Company's financial statements. The Company is assessing the impact of their new standards but does not expect them to have a significant effect on the financial statements. Pronouncements that are not applicable or do not have a significant impact to the Company have been excluded herein.

Capital Risk Management

IM Exploration's policy is to maintain a strong capital base so as to maintain investor and creditor confidence, safeguard the Company's ability to support the exploration and development of its exploration and evaluation assets and to sustain future development of the business. The capital structure of the Company consists of equity.

The Company's objective in managing capital is to maintain adequate levels of funding to safeguard the Company's ability to continue as a going concern in order to pursue the exploration and development of its mineral property interests and to maintain a flexible capital structure which will optimize the costs of capital at an acceptable risk.

The Company plans to manage its capital structure in a manner that provides sufficient funding for operational activities through funds primarily secured through equity capital obtained in private placements. There can be no assurances that the Company will be able to continue raising capital in this manner.

Although the Company has been successful at raising funds in the past through the issuance of share capital, it is uncertain whether it will be able to continue this form of financing due to the current conditions for junior mineral exploration companies. The Company makes adjustments to its management of capital in the light of changes in economic conditions and the risk characteristics of its assets, seeking to optimize its costs of capital while maintaining an acceptable level of risk.

There are no restrictions on the Company's capital and there were no changes in the Company's approach to capital management during the year.

IM EXPLORATION INC.
MANAGEMENT'S DISCUSSION AND ANALYSIS
For the Year Ended March 31, 2020
Dated - July 28, 2020

Financial Instrument Risk Management

Fair value

Fair value is the amount at which a financial instrument could be exchanged between willing parties based on current markets for instruments with the same risk, principal and remaining maturity. Fair value estimates are based on present value and other valuation techniques using rates that reflect those that the Company could currently obtain, on the market, for financial instruments with similar terms, conditions and maturities.

The Company classifies the fair value of the financial instruments according to the following hierarchy based on the observable inputs used to value the instrument:

- Level 1 – Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.
- Level 2 – Inputs other than quoted prices included in Level 1 that are observable, either directly (i.e., as prices) or indirectly (i.e., derived from prices).
- Level 3 – Prices or valuation techniques that require inputs that are both significant to fair value measurement and unobservable (i.e., supported by little or no market activity).

Credit risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur financial loss. The Company's primary exposure to credit risk is on its cash and other receivable. Cash is held with the same financial institution giving rise to a concentration of credit risk. This risk is managed by using a major Canadian bank that is high credit quality financial institution as determined by rating agencies.

Foreign exchange risk

Foreign currency risk is the risk that the fair values of future cash flows of a financial instrument will fluctuate because they are denominated in currencies that differ from the respective functional currency. The Company's exposure to foreign exchange risk is minimal.

Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company is not exposed to significant interest rate risk.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company has a planning process in place to help determine the funds required to support the Company's normal operating requirements on an ongoing basis. Liquidity risk is consider high.

MANAGEMENT'S DISCUSSION AND ANALYSIS
For the Year Ended March 31, 2020
Dated - July 28, 2020

Related Party Transactions

Related parties include the Board of Directors and officers, close family members and enterprises that are controlled by these individuals as well as certain persons performing similar functions. Related party transactions conducted in the normal course of operations are measured at the amount agreed to by the related parties.

(a) During the current reporting period the Company entered into the following transactions with related parties:

	Year ended	
	Mar 31 2020	Mar 31 2019
	\$	\$
Marrelli Support Services Inc. ("Marrelli Support") (i)	14,926	28,531
2411763 Ontario Incorporated ("2411763 ONT") (ii)	-	7,500
	14,926	36,031

- i) For the twelve months ended March 31, 2020, the Company expensed \$14,926 (twelve months ended March 31, 2019 - \$28,531) to Marrelli Support for bookkeeping services. Victor Hugo, former CFO of the Company, is an employee of Marrelli Support. As at March 31, 2020, Marrelli Support was owed \$nil (March 31, 2019 - \$15,340) and this amount was included in accounts payable and accrued liabilities.
- ii) For the twelve months ended March 31, 2020, the Company expensed \$nil (twelve months ended March 31, 2019 - \$7,500) to 2411763 ONT, for strategic advisory services provided to the Company. 2411763 ONT is a corporation controlled by a director of the Company.

(b) Remuneration of directors and key management personnel:

The Company defines its key management as the Board of Directors, Chief Executive Officer and Chief Financial Officer. Remuneration of directors and key management personnel of the Company was as follows:

	Year ended	
	Mar 31 2020	Mar 31 2019
	\$	\$
Consulting fees	3,201	-
One-time bonus (i)	20,500	-
Share-based compensation	64,002	-
	87,703	-

- i) While the CEO and directors of the Company are not paid for serving in such positions, they received bonuses upon completion of the Offering as follows: Yaron Conforti - \$7,500, Joel Freudman - \$10,500 and Johnathan Dewdney - \$2,500. The amount of \$20,500 have been accrued for and is included in accounts payable and accrued liabilities as at March 31, 2020. These amounts were paid out subsequent to year end.

MANAGEMENT'S DISCUSSION AND ANALYSIS
For the Year Ended March 31, 2020
Dated - July 28, 2020

(c) Insider shareholdings

None of the Company's major shareholders have different voting rights than other holders of the Common Shares.

As of March 31, 2020, directors and officers of the Company, with individual control of less than 10% of the total common shares outstanding, collectively control 2,500,000 common shares or approximately 24% of the total common shares outstanding. To the knowledge of the directors and officers of the Company, the remaining common shares were widely held. These holdings can change at any time at the discretion of the owner, subject to applicable escrow requirements.

Share Capital

As of the date of this MD&A, the Company had 10,400,000 issued and outstanding Common Shares.

Stock options outstanding for the Company were as follows, with each stock option exercisable to acquire one Common Share:

	Number of Options	Expiry Date	Weighted-average exercise price
	700,000	29. May 2024	\$0.100
	100,000	2. July 2024	\$0.100
	50,000	1. October 2024	\$0.090
Outstanding, March 31, 2020	850,000		\$0.099
Exercisable, July 28, 2020	850,000		\$0.099

Warrants outstanding for the Company were as follows, with each warrant exercisable to acquire one Common Share:

	Number of Warrants	Expiry Date	Weighted-average exercise price
	400,000	29. May 2021	\$0.100
Outstanding, March 31, 2020	400,000		\$0.100
Exercisable, July 28, 2020	400,000		\$0.100

IM EXPLORATION INC.
MANAGEMENT'S DISCUSSION AND ANALYSIS
For the Year Ended March 31, 2020
Dated - July 28, 2020

Disclosure of Internal Controls

Management has established processes to provide them sufficient knowledge to support representations that they have exercised reasonable diligence that (i) the Company's financial statements do not contain any untrue statement of material fact or omit to state a material fact required to be stated or that is necessary to make a statement not misleading in light of the circumstances under which it is made, as of the date of and for the periods presented by the financial statements; and (ii) the financial statements fairly present in all material respects the financial condition, results of operations and cash flows of the Company, as of the date and for the periods presented.

In contrast to the certificate required for non-venture issuers under National Instrument 52-109 *Certification of Disclosure in Issuers' Annual and Interim Filings* ("NI 52-109"), this MD&A does not include representations relating to the establishment and maintenance of disclosure controls and procedures ("DC&P") and internal control over financial reporting ("ICFR"), as defined in NI 52-109. In particular, the certifying officers of the Company are not making any representations relating to the establishment and maintenance of:

- i) controls and other procedures designed to provide reasonable assurance that information required to be disclosed by the Company in its annual filings, interim filings or other reports filed or submitted under securities legislation is recorded, processed, summarized and reported within the time periods specified in securities legislation; and
- ii) a process to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with the Company's GAAP (IFRS).

The Company's certifying officers are responsible for ensuring that processes are in place to provide them with sufficient knowledge to support the representations they are making in this MD&A. Investors should be aware that inherent limitations on the ability of certifying officers of a venture issuer to design and implement on a cost-effective basis DC&P and ICFR may result in additional risks to the quality, reliability, transparency and timeliness of interim and annual filings and other reports provided under securities legislation.

Risks and Uncertainties

The Company is in the business of exploring mineral properties, which is a highly speculative endeavor. An investment in Common Shares should be undertaken only by investors whose financial resources are sufficient to enable them to assume such risks and who have no need for immediate liquidity in their investments. Prospective investors should carefully consider the risk factors that have affected, and which in the future are reasonably expected to affect, the Company and its financial position and financial performance.

IM EXPLORATION INC.
MANAGEMENT'S DISCUSSION AND ANALYSIS
For the Year Ended March 31, 2020
Dated - July 28, 2020

Option Over the Property

The Company's right to exercise its option over the Property will be dependent upon its compliance with the Option Agreement. Option payments must be made and the Feasibility Study must be completed in order to exercise the option. The Company has paid the cash payment and issued the Common Shares stipulated in the Option Agreement. There can be no assurance that the Company will be able to comply with the other provisions of the Option Agreement, including that the Company complete the Feasibility Study to exercise its option. If the Company is unable to fulfil the requirements of the Option Agreement, it is likely that it would be considered in default of such agreement and the agreement could be terminated, resulting in the loss of all rights to the Property, and the loss of all option payments made and expenditures incurred pursuant to the option to the date of termination. Failure to obtain adequate financing or to complete exploration on a timely basis could result in the loss of the Company's right to exercise the Property option.

Insufficient Capital

The Company does not currently have any revenue producing operations and may, from time to time, report a working capital deficit. To maintain its activities, the Company will require additional funds which may be obtained either by the sale of equity capital or by entering into an option or joint venture agreement with a third party providing such funding. There is no assurance that the Company will be successful in obtaining such additional financing; failure to do so could result in the loss of the Company's interest in the Property. The Company's unallocated working capital will not be suffice to fund the recommended Phase 2 exploration program on the Property and there is no assurance that the Company can successfully obtain additional financing to fund such Phase 2 program.

Financing Risks

The Company has no history of earnings and, due to the nature of its business, there can be no assurance that the Company will ever be profitable. The only present source of funds available to the Company is through the sale of its Common Shares. Even if the results of exploration are encouraging, the Company may not have sufficient funds to conduct the further exploration that may be necessary to determine whether or not a commercially mineable deposit exists on the Property, or any additional properties in which the Company may acquire an interest. While the Company may generate additional working capital through further equity offerings or, if applicable, through the sale or option or joint venture of its properties, there is no assurance that any such funds will be available on terms acceptable to IM Exploration, or at all. If available, future equity financing may result in substantial dilution to existing shareholders. At present it is impossible to determine what amounts of additional funds, if any, may be required.

Limited Operating History and Negative Operating Cash Flow

The Company has a limited history of operations and has only conducted early-stage work on the Mulloy Project. There are no known commercial quantities of mineral reserves on the Property.

To the extent that the Company has a negative operating cash flow in future periods, the Company may need to allocate a portion of its cash reserves to fund such negative operating cash flow. The Company may also be required to raise additional funds through the issuance of equity or debt securities.

If the Company is unable to generate revenues or obtain such additional financing, any investment in the Company may be lost.

IM EXPLORATION INC.
MANAGEMENT'S DISCUSSION AND ANALYSIS
For the Year Ended March 31, 2020
Dated - July 28, 2020

Price Volatility of Publicly Traded Securities

In recent years, the securities markets in Canada and elsewhere have experienced a high level of price and volume volatility, and the market prices of securities of many companies have experienced wide fluctuations in price which have not necessarily been related to the operating performance, underlying asset values or prospects of such companies. There can be no assurance that continual fluctuations in share prices will not occur. It may be anticipated that any quoted market for the Common Shares will be subject to market trends generally, notwithstanding any potential success of the Company in exploring the Property or creating revenues, cash flow or earnings. The value of the Common Shares will be affected by such volatility.

An active public market for the Common Shares might not develop or be sustained. If an active public market for the Common Shares does not develop, the liquidity of a shareholder's investment may be limited and the share price may decline.

Property Interests

The Company does not own the mineral rights pertaining to the Property. Rather, it holds an option to acquire a 90% interest in the Property. There is no guarantee the Company will be able to raise sufficient funding in the future to undertake the Feasibility Study in order to exercise its option with respect to the Property. Furthermore, the Company's capacity to provide the Feasibility Study is uncertain. If the Company fails to undertake the Feasibility Study, the Company may lose its interest in the Property without any recourse. If IM Exploration loses or abandons its interest in the Property, there is no assurance that it will be able to acquire another mineral property of merit or that such an acquisition would be approved by the CSE. There is also no guarantee that the CSE will approve the acquisition of any additional properties by the Company, whether by way of option or otherwise, should the Company wish to do so.

In the event that IM Exploration acquires a 90% interest in the Property, there is no guarantee that title to the Property will not be challenged or impugned. The Company's mineral property interests may be subject to prior unregistered agreements or transfers, or aboriginal or indigenous land claims, or title may be affected by undetected defects. Land surveys have not been carried out on the Property; therefore, the Property's existence and area could be in doubt. Until competing interests in the mineral lands have been determined, the Company can give no assurance as to the validity of title of the Company to those lands or the size of such mineral lands.

First Nations Land Claims

First Nations rights may be claimed on Crown properties or other types of tenure with respect to which mining rights have been conferred. The Supreme Court of Canada's 2014 decision in *Tsilhqot'in Nation v. British Columbia* marked the first time in Canadian history that a court has declared First Nations title to lands outside of reserve land. The Property may now or in the future be the subject of aboriginal or indigenous land claims. The legal nature of aboriginal land claims is a matter of considerable complexity. The impact of any such claim on the Company's ownership interest in the Property cannot be predicted with any degree of certainty and no assurance can be given that a broad recognition of aboriginal rights in the area in which the Property is located, by way of a negotiated settlement or judicial pronouncement, would not have an adverse effect on the Company's activities. Even in the absence of such recognition, the Company may at some point be required to negotiate with and seek the approval of holders of aboriginal interests in order to facilitate exploration and development work on the Property, and there is no assurance that the Company will be able to establish a practical working relationship with any First Nations in the area which would allow it to ultimately develop the Property. The Property is under the care of Constance Lake First Nation, and therefore Aboriginal Consultation is required prior to work on the Property, according to the Mining Act (Ontario). To date, the Company has had preliminary negotiations with Constance Lake First Nation but has not entered into any formal agreement or understanding regarding future exploration at the Property.

IM EXPLORATION INC.
MANAGEMENT'S DISCUSSION AND ANALYSIS
For the Year Ended March 31, 2020
Dated - July 28, 2020

Exploration and Development

Resource exploration and development is a speculative business, characterized by a number of significant risks including, among other things, unprofitable efforts resulting not only from the failure to discover mineral deposits but also from finding mineral deposits that, though present, are insufficient in quantity and quality to return a profit from production. The Property is considered to be in the early exploration and development stage. At present, no mineral resources have been identified at the Property. There is no certainty that further exploration and development will result in the identification of indicated or measured resources, or probable or proven reserves, at the Property, or that if any mineral resources or reserves are defined at the Property that the anticipated tonnages and grades will be achieved or that the indicated level of recovery will be realized.

The marketability of minerals acquired or discovered by the Company may be affected by numerous factors which are beyond the control of the Company and which cannot be accurately predicted, such as market fluctuations, the proximity and capacity of milling facilities, mineral markets and processing equipment and such other factors as government regulations, including regulations relating to royalties, allowable production, importing and exporting of minerals, and environmental protection, the combination of which factors may result in the Company not receiving an adequate return of investment capital.

There is no assurance that the Company's mineral exploration and development activities will result in any discoveries of commercial bodies of ore on the Property or elsewhere. The long-term profitability of the Company's operations will in part be directly related to the costs and success of its exploration programs, which may be affected by a number of factors. Substantial expenditures are required to establish reserves through drilling and to develop the mining and processing facilities and infrastructure at any site chosen for mining. Although substantial benefits may be derived from the discovery of a major mineralized deposit, no assurance can be given that minerals will be discovered in sufficient quantities to justify commercial operations or that funds required for development can be obtained on a timely basis.

Uninsurable Risks

In the course of exploration and development of mineral properties, certain risks may occur, including in particular unexpected or unusual geological operating conditions such as rock bursts, cave-ins, fires, flooding and earthquakes. It is not always possible to fully insure against such risks and the Company may decide not to take out insurance against such risks as a result of high premiums or other reasons. Should such liabilities arise, they could reduce or eliminate any future profitability by the Company and result in increasing costs and a corresponding decline in the value of the Common Shares.

Environmental Laws and Regulations

Environmental laws and regulations may affect the operations of the Company. These laws and regulations set various standards regulated certain aspects of health and environmental quality. They provide for penalties and other liabilities for the violation of such standards and establish, in certain circumstances, obligations to rehabilitate current and former facilities and locations where operations are or were conducted. The permission to operate can be withdrawn temporarily where there is evidence of serious breaches of health and safety standards, or even permanently in the case of extreme breaches. Significant liabilities could be imposed on the Company for damages, clean-up costs or penalties in the event of certain discharges into the environment, environmental damage caused by previous owners of acquired properties, or non-compliance with environmental laws or regulations. The Company intends to minimize risks by taking steps to ensure compliance with environmental, health and safety laws and regulations and operating to applicable environmental standards. There is a risk that environmental laws and regulations may become more onerous, making the Company's operations more expensive.

IM EXPLORATION INC.
MANAGEMENT'S DISCUSSION AND ANALYSIS
For the Year Ended March 31, 2020
Dated - July 28, 2020

Amendments to current laws, regulations and permits governing operations and activities of mining companies, or more stringent implementation thereof, could have a material adverse impact on the Company and cause increases in capital expenditures or require abandonment or delays in development of new mining properties.

Permits

The mineral exploration operations of the Company may require permits from various federal, provincial and local governmental authorities and will be governed by laws and regulations on prospecting, development, mining, production, export, taxes, labour standards, occupational health, waste disposal, land use, environmental protections, mine safety and other matters. There can be no guarantee that the Company will be able to obtain all necessary permits and approvals that may be required to undertake exploration activity or commence construction or operation of mine facilities on the Property.

Competition

The mining industry is intensely competitive in all phases and the Company competes with other companies that have greater financial resources and technical facilities. Competition could adversely affect the Company's ability to acquire suitable properties or prospects in the future and to engage qualified personnel to explore the Property.

Fluctuating Mineral Prices

The Company's revenues, if any, are expected to be in large part derived from the extraction and sale of industrial and base minerals and metals. Factors beyond the control of the Company may affect the marketability of metals discovered, if any. Metal prices have fluctuated widely, particularly in recent years. Consequently, the economic viability of the Mulloy Project and any other exploration projects the Company may acquire from time to time cannot be accurately predicted and may be adversely affected by fluctuations in mineral prices. In addition, currency fluctuations may affect the cash flow which the Company may realize from its operations, since most mineral commodities are sold in the world market in United States dollars.

Conflicts of Interest

Some of the directors and officers of the Company are engaged and will continue to be engaged in the identification and evaluation of assets, businesses and companies on their own behalf and on behalf of other companies, and situations may arise where the directors and officers of the Company will be in direct competition with the Company. Conflicts, if any, will be dealt with in accordance with the relevant provisions of the *Canada Business Corporations Act*. Any director or officer in a position of conflict will declare such conflict to the Company's Chief Executive Officer and/or board of directors, as appropriate. Directors who are in a position of conflict will abstain from voting on any matters relating to the conflicting transaction.

Personnel

The Company has a small management team and Board of Directors and the loss of any key individual could adversely affect the Company's business. Additionally, the Company will be required to secure other personnel to facilitate its exploration program on the Property. Any inability to secure and/or retain appropriate personnel may have a materially adverse impact on the business and operations of the Company.

COVID-19 Global Pandemic

The novel coronavirus (“COVID-19”) pandemic continues to impact the economic conditions and financial markets. The Company is continually monitoring the potential impact on its operations and the Company’s exploration operations and access to capital have been adversely impacted and delayed. The full extent of the impact on the Company’s future financial results is uncertain given the length and severity of these developments cannot be reliably estimated.
